EDUCATION

Minia University Faculty of Engineering Computer and Systems Department
2017 - 2022

PROFILE

I'm a front-end web developer with a main interest in web development and deep learning. I'm interested in experiencing collaboration with other developers to develop, design and maintain projects that make a difference in people's life.

WORK EXPERIENCE

Visyond

Remote - Part-time

Front-end web developer internship

August 2021 - Sept 2021 / October 2022 - Now

I work on design and create features for the company's software. The main features I worked on were creating a font resizing feature for multiple parts of the website, optimizing the collision resolving algorithm used with chart labels, and changing the data labeling technique with circular charts.

Graduation Project

Geo-localization with deep learning

Sept 2021 - August 2022

I worked on generating and preparing a Geo-spatial dataset for a geo-localization solution based on the temporal context of the ground level of view trajectories, and developed a new deep learning model that benefits from the contextual feature exists in the created data.

PROJECTS

Bookish Brief

React.js, Redux, Express, Postgresql

Store notes about books

- List all books with brief descriptions and book information.
- Filter books based on category.
- Delete unwanted books

SKILLS

- Python, Javascript, Typescript, HTML5, and CSS3.
- PostgreSQL.
- ReactJS, Redux, JQuery, D3.js, C3.js, Recharts, Node.js, Express, and Jasmin.
- Chrome dev tools.
- Windows, Linux, Git, and Docker.
- **Intermediate-level problem-solving.**
- **Good team player.**
- **Agile work experience.**
